

Nego pursuit : The Common Front negotiations in questions !

Negotiations in the public and parapublic sectors are now well under way. We must continue to talk about the negotiations in our workplaces so that members are aware of the Front Commun's demands.

And why not have fun doing it? The Front Commun has designed a new game to help us learn more about each other and our demands.

We invite you to hold the activity between February 22 and March 10 and, especially, to remind all participants that we are counting on their attendance at the major Front Commun demonstration in Montreal on March 20!

You will find enclosed a guide to help you organize the activity.

The more, the merrier !

We invite you to encourage as many people as possible to participate in the game. It will be played in every institution by members of every Front Commun union!

Have fun!
Together for public services!
